Affordable Healthcare to All  
Unique One Year Fellowship Program  
Seed Grant Funded Incubation

Challenging the status quo in Medical  
Devices, Diagnostics and Healthcare  
services through Innovation

Follow us on Social Media

## How do we do it

As a DST approved incubator, CfHE achieves this through incubating companies engaged in innovative medical devices, medical services and other healthcare needs. These companies are incubated after a world class one year healthcare entrepreneurship education program, in which fellows undergo structured bio-design thinking process, identify unmet clinical needs through clinical immersion at leading hospital partners in Hyderabad, innovate solutions and prototype them along with strong mentoring in setting up business, as well as regulatory practices.

## Impact of what we do

As a validation of the success of CfHE Fellowship program, six out of twenty five fellowships are sponsored by the Indian Council of Medical Research (ICMR) under ICMR-MDMS\* project entitled "ICMR Bio-design Center of Excellence program for IIT-Hyderabad" From 2016, 22 fellows have graduated and 9 companies have been formed. The companies are in a diverse fields like neonatal, neuro rehabilitation, adult faecal management system, maternal health during pregnancy, innovative differential ventilator, very successful innovative service model- Vaccine on Wheels, innovative Surgical retractor and Innovative OT Suite that automates the entire surgical armamentarium and its inventory.

## Board of Directors
